

NOAH L. MYERS

214-843-5882 | Noah2126212@gmail.com | github.com/Nmyers21 | linkedin.com/in/noah-myers-6354322bb

CERTIFICATIONS & TRAINING

CompTIA: Security+, Network+, A+, Data+, Project+, PenTest+
CompTIA: Network Vulnerability Assessment Professional (CNVP) - Stackable Certification
Linux Professional Institute (LPI): Linux Essentials
PeopleCert: ITIL 4 Foundation | **TryHackMe:** Pre Security (SEC0)
TryHackMe: Top 3% globally

TECHNICAL SKILLS

AI red teaming	Prompt engineering	LLM evaluation
Adversarial prompt design	Prompt-injection testing	Jailbreak analysis
AI safety evaluation	Model behavior analysis	Safety policy testing
Python	Git / GitHub	MITRE ATT&CK
Threat modeling	Linux	Log analysis

EXPERIENCE

Mercor AI Research Analyst / AI Red Teamer - Design adversarial prompts to evaluate LLM instruction-following, prompt-injection resistance, jailbreak behavior, and policy compliance. - Designed 100+ multi-turn attack scenarios to test model behavior under simulated misuse and malicious requests. - Document reproducible test cases, model failure patterns, and mitigation recommendations for AI security research.	Jan 2026 - Present
LinkedIn AI Security Analyst (Contract) - Evaluate 100+ AI-generated outputs weekly for adversarial behavior, prompt injection, and policy-evasion risks. - Identify recurring failure patterns and high-risk edge cases to support consistent safety evaluations. - Produce structured findings to support AI safety review and training-data quality initiatives.	Apr 2026 - Present
Outlier AI Red Team Operative - Identified 25+ AI security weaknesses through adversarial testing, including prompt injection and safety-policy bypasses. - Developed adversarial attack scenarios to probe model safeguards and identify failure modes during AI safety evaluations. - Applied threat modeling and risk analysis to assess AI misuse scenarios against enterprise security and abuse-prevention controls.	Feb 2025 - Dec 2025
Welocalize Search Quality Rater - Reviewed and analyzed 150+ daily search queries for phishing, malware, and deceptive-content indicators. - Maintained 95% accuracy while identifying malicious patterns and enforcing platform policy standards. - Contributed to large-scale search quality and safety initiatives by flagging high-risk and misleading content.	Feb 2024 - Sep 2024
Hilton Hotels IT Systems Support Specialist - Provided Tier 1/2 support for Windows and macOS, troubleshooting employee hardware and software issues. - Supported hotel staff with software setup, system troubleshooting, and technical issue resolution. - Troubleshoot network connectivity issues to support day-to-day hotel IT operations.	Sep 2021 - Jul 2022

EDUCATION

B.S. Cybersecurity and Information Assurance	Western Governors University
A.S. Cybersecurity	Tarrant County College

SELECTED PROJECTS

AI Red Team Platform | Python, OpenAI-compatible API
Developed a prototype for reproducible adversarial case generation, model replay, rule-based evaluation, and aggregate reporting.
github.com/Nmyers21/ai-redteam-platform

SOC Automation & Detection Platform | Python
Built a Python lab to analyze simulated Windows security events, prioritize alerts, map attack patterns to MITRE ATT&CK, and generate incident reports.
github.com/Nmyers21/SOC-L1-Skills-Demo
